**Coverstock:** S59™ Solid

**Finish:** ICE "C" (2,000 Grit)

**Color:** Red/Black

**Core:** Pod™ Symmetric

**Flare Potential:** 3-4"

**SKU:** GXX

**Available Weights:** 12-16 Lbs

## Tour Preferred 700 Series

- The S59™ Solid coverstock provides consistent and predictable friction.
- The symmetric Pod™ core produces controlled flare and a smooth transition.
- Use the X<sup>2</sup> on medium length and volume patterns.

The All New X<sup>2</sup>™ will be the premier benchmark ball for the serious bowler as well as the obvious choice to conquer demanding lane conditions.

The POD™ Symmetric Core from the original X™ has been brought back for the X<sup>2</sup>. This core provides early revolutions with a very predictable downlane motion. Perfect for tougher lane conditions where the backends are very touchy.

Wrapped around this core is the All New S59™ solid coverstock. This coverstock will provide the perfect balance of traction in the oil combined with a predictable backend motion.
